

Exercises for  
Computer Vision Lecture  
Winter Semester 2025/26

**Exercise 1**  
30<sup>th</sup> of October, 2025

Prof. Dr. Ralph Ewerth  
Omkar Gavali  
AI Research Group – Multimodal Modelling and Machine Learning  
Department of Mathematics and Computer Science & hessian.AI  
Marburg University

Completion of tests in ILIAS by: Wed 05 Nov, 2025, 23:55

Discussion of assignments: Thu 06 Nov, 2025, 16:00

---

**1. Exercise and review of the lecture material for chapter 1**

For a deeper understanding of the lecture and slide content, please proceed as follows:

Complete „Exercise 1“ in the ILIAS system.

The test consists of several multiple-choice questions. You have the opportunity to answer the multiple-choice questions in two attempts. The second attempt is available after a break of at least one hour. This allows you to review any material that you found challenging.

---

**2. Questions about the lecture**

I am happy to answer questions about the lecture content in the **ILIAS** forum and / or chat. We will address these in the next exercise session and may provide further explanations if needed.
